TITLE CATALOG OF PERIODICALS

INCLUDING NEWSPAPERS AND SELECTED SERIALS

SAN FRANCISCO PUBLIC LIBRARY
3 1223 10225 5909

This title catalog lists the periodical holdings of the San Francisco Public Library and includes titles which have ceased publication as well as those currently received. The newspaper titles are listed in a separate alphabet at the end of the volume. A selection of government publications, annuals, symposiums, yearbooks, transactions and proceedings is also included to bring the total number of titles to approximately 6,450.

The catalog lists holdings of Main Library subject departments, Civic Center, and the Business Branch Library, 138 Kearny Street. If a periodical is available to the public in more than one of these locations, a separate entry has been made for each location.

In general, the periodicals are listed under the latest title with "see" references from earlier titles. Journals, transactions, bulletins and proceedings are listed under the name of the society publishing them unless they have a distinctive title, in which case they are entered under it. The statement of our holdings is given in brief form, without an abbreviation for volume before the volume numbers, and with months abbreviated to two characters. If the publication is in any medium other than paper; i.e., microfilm, this is indicated in the holdings statement. If the title listing does not show a holdings statement, it can be presumed that the title is on order and the user may check with the department to see if issues have arrived. The number in the right-hand column is a serial number used by the computer to arrange the titles in alphabetical order.

This catalog was produced as part of our Computerized Serials System, which includes an arrival (check-in) program, binding notification form up-date of the binding record, subscription order lists, plus additional catalogs arranged by subject and by foreign language. The computer programs are run by the EDP Center of the City and County of San Francisco utilizing an IBM 360/50 computer.

We gratefully acknowledge funds from the Bay Area Reference Center Project which made possible the publication and distribution of this initial catalog.
